

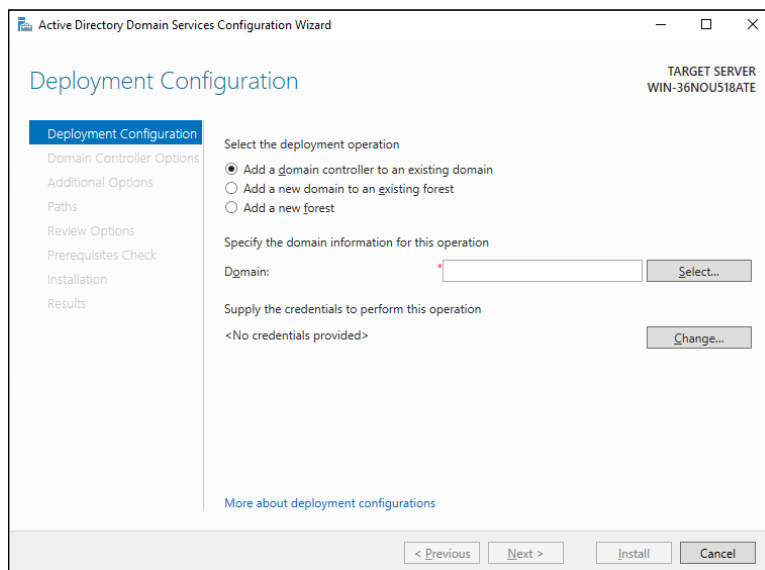

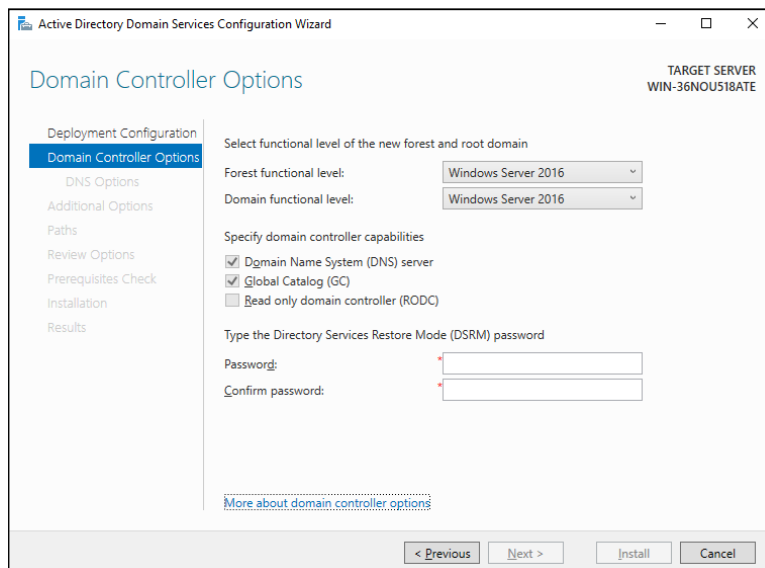

**FIGURE 11-16:**  
Additional  
configuration  
needs to be done  
for the Active  
Directory Domain  
Services role.

**FIGURE 11-17:**  
Here you can  
set domain  
controller  
options.

## 5. Enter your recovery password twice, and then click Next.

You see a DNS Options screen that indicates a potential problem regarding DNS delegation, which, for the purposes of our little exercise, you can safely ignore.
