

#### 4. Click Permissions.

The dialog box shown in Figure 13-11 appears. This dialog box lists all the users and groups to whom you've granted permission for the folder. Initially, read permissions are granted to a group called Everyone, which means that anyone can view files in the share but no one can create, modify, or delete files in the share.

When you select a user or group from the list, the check boxes at the bottom of the list change to indicate which specific permissions you've assigned to each user or group.

**FIGURE 13-11:** Set the share permissions.

#### 5. Click the Add button.

The dialog box shown in Figure 13-12 appears.

#### 6. Enter the name of the user or group to whom you want to grant permission and then click OK.

**TIP**

If you're not sure of the name, click the Advanced button. This action brings up a dialog box from which you can search for existing users.

When you click OK, you return to the Share Permissions tab (refer to Figure 13-11), with the new user or group added.
