Understanding shares

A *share* is simply a folder that is made available to other users via the network. Each share has the following elements:

- » **Share name:** The name by which the share is known over the network
- » **Path:** The path to the folder on the local computer that's being shared, such as C:\Accounting
- » **Description:** A one-line description of the share
- » **Permissions:** A list of users or groups who have been granted access to the share
