

1. In the Server Manager, click Add Roles and Features.
2. Follow the wizard until you get to the Select Features page, which is shown in Figure 16-1.

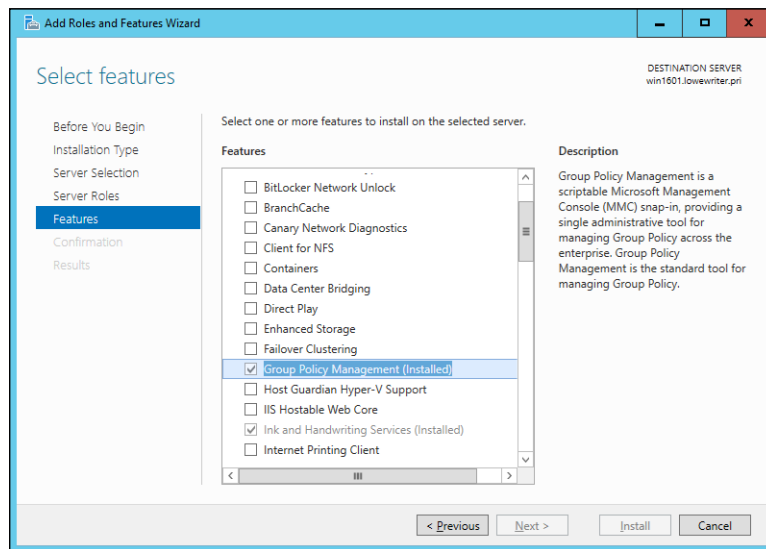

FIGURE 16-1:
Enabling
Group Policy
management
on Windows
Server 2019.

3. If the Group Policy Management check box is not already checked, select it.
4. Click Next.
5. When the confirmation page appears, click Install.
Be patient; installation may take a few minutes.
6. Click Close.
You're done!

After you've completed this procedure, a new command titled Group Policy Management appears on the Tools menu in the Server Manager.

Creating Group Policy Objects

The easiest way to create GPOs is to use the Group Policy Management Console, which you can run from the Server Manager by choosing Tools ⇨ Group Policy Management.
