

**2. Click Next.**

The Specify Name and Location page appears, as shown in Figure 10-11.

**FIGURE 10-11:**  
Specify the name  
and location of  
the virtual  
machine.

**3. Enter the name you want to use for your virtual machine.**

You can choose any name you want here.

**4. Specify the location of the virtual machine's configuration file.**

Every virtual machine has an XML file associated with it that defines the configuration of the virtual machine. You can allow this file to be stored in the default location, or you can override the default and specify a custom location.

**5. Click Next.**

The Specify Generation page appears, as shown in Figure 10-12.

**6. Specify the generation you want to use for the new virtual machine.**

In most cases, you should opt for Generation 2, which uses newer technology than Generation 1 machines. Use Generation 1 only if the guest operating system will be earlier than Windows Server 2012 or Windows 8.

**7. Click Next.**

The Assign Memory page appears, as shown in Figure 10-13.
