

### 9. Click Next.

A confirmation screen appears, summarizing the options you've selected for your new disk.

### 10. Click Finish.

The new disk is created. Note that if you selected Fixed Disk as the disk type, creating the disk can take a while because the entire amount of disk storage you specified is allocated to the disk. Be patient.

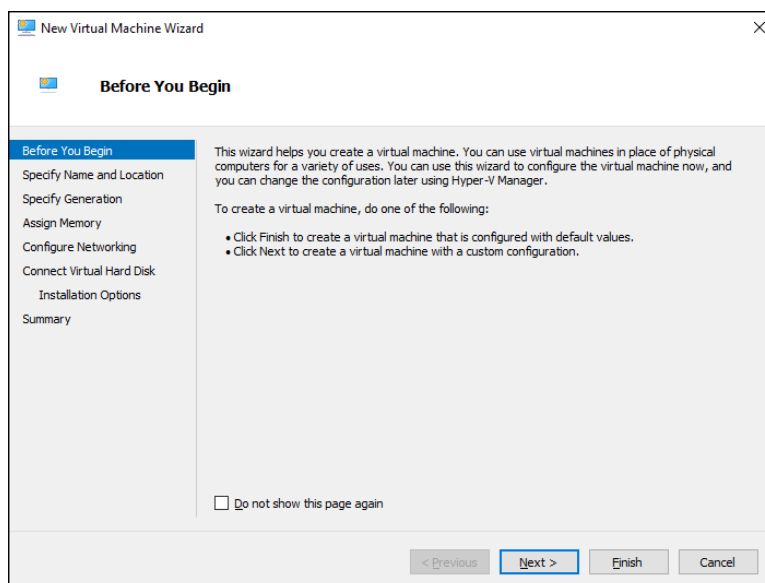

You're done! You've now created a virtual disk that can be used as the basis for a new virtual machine.

## Creating a Virtual Machine

After you've created a virtual disk, creating a virtual machine to use it is a straightforward affair. Follow these steps:

### 1. From the Hyper-V Manager, choose New and then choose Virtual Machine.

This brings up the New Virtual Machine Wizard, as shown in Figure 10-10.

**FIGURE 10-10:**  
Say hello to the  
New Virtual  
Machine Wizard.
