

7. Click the **Permissions** button and then set the permissions you want to apply to the share.

For more information, see the next section.

8. Click **OK**.

The folder is now shared.

Set the share
name.

Granting permissions

When you first create a file share, all users are granted read-only access to the share. If you want to allow users to modify files in the share or allow them to create new files, you need to add permissions. Here's how to do this using Windows Explorer:

1. Open Windows Explorer by pressing the Windows key and clicking **Computer**; then browse to the folder whose permissions you want to manage.
2. Right-click the folder you want to manage and then choose **Properties** from the contextual menu.

The Properties dialog box for the folder appears.

3. Click the **Sharing** tab; then click **Advanced Sharing**.

The Advanced Sharing dialog box appears.
