FIGURE 18-5:
Enter your
Exchange server
information.

6. **Enter either the DNS name or the IP address of your Exchange server in the Server field.**
7. **Enter your domain name, your Windows username, and your Windows password in the appropriate fields.**
8. **Tap Next.**

The screen shown in Figure 18-6 appears. Here, you select which mailbox features you want to synchronize: Mail, Contacts, Calendars, Reminders, and/or Notes.

9. **Select the features you want to synchronize and then tap Done.**

The email account is created.

After the email account has been configured, the user can access it via the Mail icon on the iPhone's home screen.
