

**FIGURE 11-2:**  
Selecting the OS  
edition to install.

**4. Select the edition you want to install and then click Next.**

The Setup Wizard displays the License Agreement information. Read it if you enjoy legalese.

**5. Click I Accept the License Terms and then click Next.**

The Setup Wizard asks whether you want to perform an upgrade installation or a full installation.

**6. Click the installation option you want to use.**

Setup continues by displaying the disk drives available on the computer so that you can choose where to install Windows, as shown in Figure 11-3. In this example, there is just one drive, so there isn't really a choice.

**7. Select the disk on which you want to install Windows and then click Next.**

Setup formats the drive and then copies files to the newly formatted drive. This step usually takes a while. I suggest you bring along your favorite book. Start reading at Chapter 1.

After all the files have been copied, Setup reboots your computer. Then Setup examines all the devices on the computer and installs any necessary device drivers. You can read Chapter 2 of your book during this time.

When Setup finishes installing drivers, it asks for the password you want to use for the computer's Administrator account, as shown in Figure 11-4.
