3. **Right-click the user and then choose Properties from the contextual menu.**

4. **Click the Exchange Features tab.**

The Exchange Features options are displayed, as shown in Figure 18-1.

FIGURE 18-1:
Enabling
Exchange
ActiveSync
for a user.

5. **Ensure that the Exchange ActiveSync option is enabled.**

If the options aren't already enabled, right-click each option and choose Enable from the contextual menu.

6. **Click OK.**

7. **Repeat Steps 5 and 6 for any other users you want to enable mobile access for.**

8. **Close Active Directory Users and Computers.**

That's all there is to it. After you enable these features, any users running Windows Mobile can synchronize their handheld devices with their Exchange mailboxes.
