FIGURE 10-12:
Specify the generation of the new virtual machine.

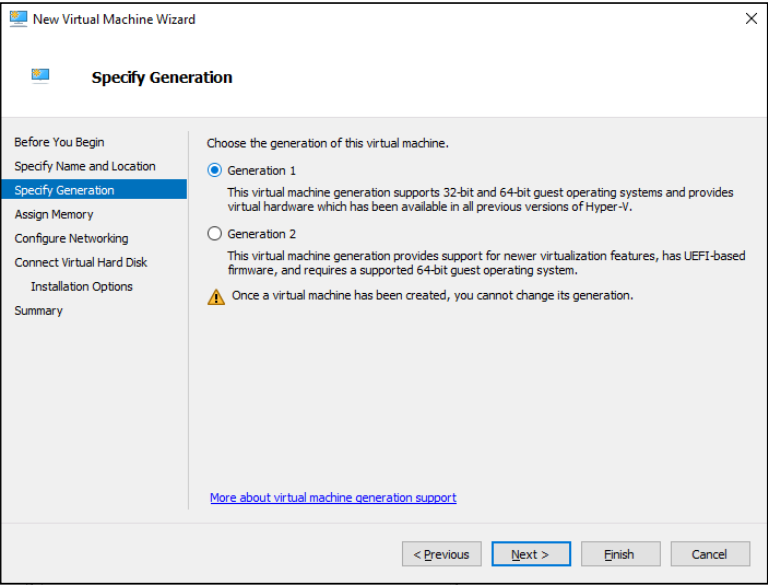

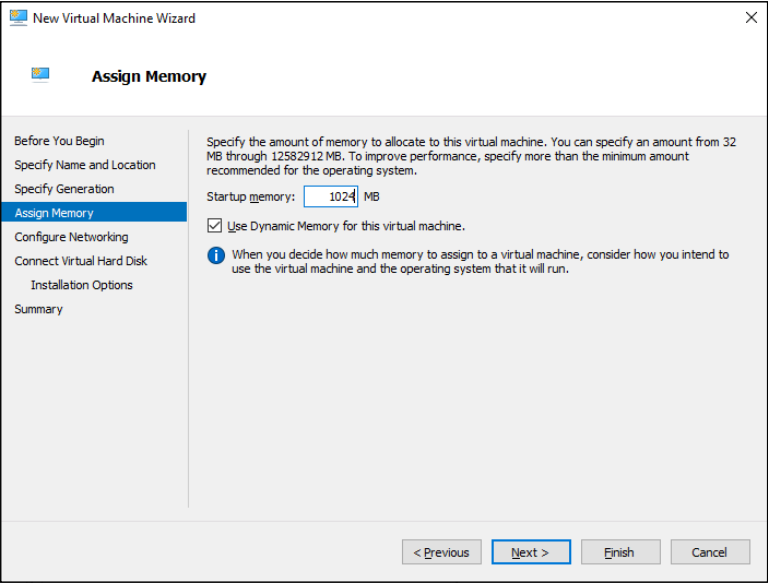

FIGURE 10-13:
Specify the memory for the new virtual machine.

8. **Indicate the amount of RAM you want to allocate for the new machine.**

The default is 2,048MB, but you'll almost certainly want to increase that.

I also recommend that you select the Use Dynamic Memory for This Virtual Machine check box, which improves memory performance.
